MEMORANDUM FOR:

THROUGH:

SUBJECT: Electronic Emitters and Weapons Systems in Egypt.

REFERENCE: Requirement No. NSA/SOC/R-102-69
NPIC Project No. 250348

1. The requirement referenced above requested an analysis of photography for evidence of electronic emitters and weapons systems within 10 nautical miles of 21 selected locations in Egypt, with special attention to the deployment of FLAT FACE radars or any weapons system with which they may be associated. 25X1

25X1

2. Although all of the designated search areas were not completely covered by current photography, a thorough search of available photography revealed several electronic emitters and weapons systems. Only one radar could be identified as a possible FLAT FACE. The FLAT FACE, which can be utilized as the target acquisition radar at SA-3 surface-to-air-missile (SAM) sites, at radar-controlled AAA sites, and as a gap-filler radar in early warning nets, is difficult to and the fact that only one possible identification was made should not be interpreted as conclusive evidence that no other FLAT FACE radars are deployed in these areas.

25X1D

3. In cases where search areas overlap, radar facilities and weapons systems located in the overlap area are included in the report of only one of the search areas. See Attachment for a detailed analysis of the areas searched.

4. This project is considered to be complete. Questions regarding this project may be directed to the Imagery Analyst, of the Western Geographic Branch, WGD/IEG, on extension 25X1A
